Art Unit: 1645

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Election/Restrictions

Group I Claims 1-2, 6, 14 and 18 are drawn to a detoxified protein.

Group II Claims 3-5, 7-9 and 15-17 and 19-20 are drawn to a DNA, vector and host cell.

Group III Claims 10 and 11 are drawn to a method of preparing a detoxified protein.

Group IV Claim 12 and 13 are drawn to a vaccine and mucosal adjuvant.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of Group I is a detoxified protein. The special technical feature lacks novelty under PCT Article 33(2) as anticipated by Domenighini et al, (*EP 0 620 850 B1 published March 3, 1999*). Domenighini et al teach detoxified proteins of cholera toxins or heat labile toxins produced by *E. coli* which have a substitution at amino acid 63 (see the Abstract), Group I is the main invention in this application and it lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Inasmuch as, the technical feature does not define a contribution over the art, it is not "special" within the meaning of PCT Rule 13.2. Consequently, Groups I-IV lack unity of invention.
